

# CALIFORNIA Hazmat Response Resources

BUILDING AMERICA®

The Union Pacific Hazardous Materials Management Group (HMM) consists of experts in hazardous material transportation safety, securement and response. Part of Union Pacific Railroad's Safety Department, the HMM Group's primary focus is the safety of Union Pacific employees, the residents of communities where we operate trains and our customers.

Union Pacific has access to incident response equipment and assets across California. The HMM Group communicates regularly with 184 fire departments along Union Pacific rail lines in California to offer comprehensive hazmat response training in communities where we operate. Union Pacific trained more than 3,100 emergency responders across California since 2010. This includes classroom and hands-on training in tank car anatomy, hazmat shipping documentation and equipment securement.

**Union Pacific has access to more than 176,000 feet of containment boom in the state.**

## DUNSMUIR

- Union Pacific boom trailers

## CHICO

- NRC Environmental boom trailers

## ROSEVILLE

- Hazardous Materials Manager
- Midland Capping Kit
- Magnetic patch
- Union Pacific hazmat response vehicle
- Tank car training trailer
- Fire fighting trailer with four totes of foam
- 10,000 gallon portable water tank
- Chemical transfer trailer

## RICHMOND

- Patriot Environmental
